Definition of Done for the First Release of MAT3D
Mat3D (Matrix Masters)

All of the following must be completed in order for the first release of MAT3D to be "done":
1. All user stories, including those in the product backlog, must be completed as per the "Definition of Done for User Stories" document.
2. Deliberation on whether the completion of all user stories constitutes a "done" first release will commence. Criteria kept in mind will be:
    a. The computation of matrices
    b. The loadability of 3D models.
    c. The usage of matrices as transformations on 3D models.
    d. The implementation and experience of the user interface.
3. Say goodbye to CMPS 115.
